

LESS 2009

60th IUVSTA workshop on Low Energy Spectroscopy & Simulations

11th - 13th November 2009, Vienna/Austria
Haus der Forschung - Sensengasse 1, 1090 Wien

Spectrometries of the low energy region are currently a hot topic. Many different experimental techniques (optical absorption, resonant inelastic X-ray scattering, reflection EELS, valence (transmission) EELS, ellipsometry, ...) as well as theoretical approaches (TDDFT, BSE, ...) to the dielectric function with little if no overlap between the different fields exist. With this school we provide lectures from different fields for a synoptic view of the subject.

To ensure an interactive atmosphere, the number of participants is limited to 60.

Fees:

€ 175,- (including Conference dinner and coffee breaks)

Invited speakers:

E. Chulkov - Bilbao, Spain
J. García de Abajo - San Sebastian, Spain
C. Hébert - EPFL, Switzerland
G. Kothleitner - Graz, Austria
J. Krenn - TU Graz, Austria
W. Sigle - MPG Stuttgart, Germany
P. Schattschneider - TU Wien, Austria
E.L. Shirley - NIST, USA
O. Stephan - Paris Sud, France
M. Stöger-Pollach - TU Wien, Austria
W. Werner - TU Wien, Austria

Contributions :

Contributions are welcome as oral or poster presentations.
